Office Action Summary

Application No.

10/505,472

Applicant(s)

GILDER ET AL.

Examiner

John m. Cooney

Art Unit

1711

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-40 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-40 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 20 August 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Grace et al.(4,892,893).

Grace et al. disclose methods for preparing polyurethane foams by mixing and reacting polyol, isocyanate, water, melamine, and other fire retardants under mixing conditions reading on those claimed (see column 2 line 22 - column 7 line 48 and the examples, as well as, the entire document). Densities as claimed are disclosed, and, owing to the physical material contents, the claimed IFD and air flow values are seen to be inherent to the teachings of Grace et al.

Claims 1-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Grace et al.(4,849,459).

Grace et al. disclose methods for preparing polyurethane foams by mixing and reacting polyol, isocyanate, water, melamine, and other fire retardants under mixing conditions reading on those claimed (see the entire document). Densities as claimed

Art Unit: 1711

are disclosed, and, owing to the physical material contents, the claimed IFD and air flow values are seen to be inherent to the teachings of Grace et al.

Claims 1-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Ricciardi et al.(4,757,093).

Ricciardi et al. disclose methods for preparing polyurethane foams by mixing and reacting polyol, isocyanate, water, melamine, and other fire retardants under mixing conditions reading on those claimed (see column 3 line 9 - column 5 line 65 and the examples, as well as, the entire document). Densities as claimed are disclosed, and, owing to the physical material contents, the claimed IFD and air flow values are seen to be inherent to the teachings of Ricciardi et al.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 36-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grace et al.('893) as applied to claims 1-35 above, and further in view of Eiben et al.(5,789,457) and Webster et al.(3,862,921).

Grace et al. differs from applicants' claims in that it does not particularly require filtering of its mixtures before of after passing through the mixing head. However, Eiben et al.(see abstract and claims) and Webster et al.(see column 6 lines 8-15) disclose employment of filter screens in polyurethane polymer processing operations for their filtration and other material enhancing effects. Accordingly, it would have been obvious for one having ordinary skill in the art to have employed filters as disclosed by Eiben et al. and Webster et al. before and after ejection of the materials from the mixing head in the preparations of Grace et al. for the purpose of imparting their known filtration and materials enhancing effects in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

As for Grace et al.'s removal of polyol filters in its processes (column 7 lines 24-32), it is held that all disclosures of the prior art, including unpreferred or auxiliary embodiments, must be considered in determining obviousness. In re Mills, 176 USPQ; In re Lamberti, 192 USPQ 278; In re Boe, 148 USPQ 507.

Art Unit: 1711

Claims 36-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grace et al.('893) as applied to claims 1-35 above, and further in view of Eiben et al.(5,789,457) and Webster et al.(3,862,921).

Grace et al. differs from applicants' claims in that it does not particularly require filtering of its mixtures before of after passing through the mixing head. However, Eiben et al.(see abstract and claims) and Webster et al.(see column 6 lines 8-15) disclose employment of filter screens in polyurethane polymer processing operations for their filtration and other material enhancing effects. Accordingly, it would have been obvious for one having ordinary skill in the art to have employed filters as disclosed by Eiben et al. and Webster et al. before and after ejection of the materials from the mixing head in the preparations of Grace et al. for the purpose of imparting their known filtration and materials enhancing effects in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

Claims 36-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ricciardi et al. as applied to claims 1-35 above, and further in view of Eiben et al.(5,789,457) and Webster et al.(3,862,921).

Ricciardi et al. differs from applicants' claims in that it does not particularly require filtering of its mixtures before of after passing through the mixing head. However, Eiben et al.(see abstract and claims) and Webster et al.(see column 6 lines 8-

Art Unit: 1711

15) disclose employment of filter screens in polyurethane polymer processing operations for their filtration and other material enhancing effects. Accordingly, it would have been obvious for one having ordinary skill in the art to have employed filters as disclosed by Eiben et al. and Webster et al. before and after ejection of the materials from the mixing head in the preparations of Ricciardi et al. for the purpose of imparting their known filtration and materials enhancing effects in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Cooney whose telephone number is 571-272-1070. The examiner can normally be reached on M-F from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck, can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
